PROJECT PROPOSAL

AI-Powered 30-Day Content Calendar Generator

Personalized social media plans for brands, creators, students and founders.

THE PROBLEM

Consistent content is hard to plan

Time-consuming

Brainstorming ideas, formats, hooks and captions every day takes time better spent creating.

Creative blocks

Running out of fresh, relevant ideas leads to repeated posts and stalled accounts.

Inconsistent posting

Without a plan, publishing becomes irregular and audience momentum is lost.

THE SOLUTION

Choose your audience, platform and goal. Get a full 30-day plan.

Personalized by AI and organized into a simple daily schedule.

WHAT USERS CHOOSE

Three choices shape the calendar

Target audience

- Brands
- Creators
- Students
- Founders

Social platform

- Instagram
- LinkedIn
- YouTube

Content goal

- Increase audience reach
- Improve engagement
- Promote products
- Build a personal brand

WHAT USERS RECEIVE

Every day gets a ready-to-use plan

Daily idea, format, hook, caption and call to action. Illustrative sample: a founder on LinkedIn building a personal brand.

Day	Format	Content idea	Hook	Call to action
Day 1	Text post	Why I started my company	I almost quit before I began.	Share your story below
Day 2	Carousel	Five lessons from my first year	Year one taught me five hard truths.	Save this for later
Day 3	Short video	Behind the scenes of my workday	Here is what a real day looks like.	Request a topic
Day 4	Explainer	Beginner mistakes to avoid	Avoid these three costly mistakes.	Follow for more tips

WHO BENEFITS

One tool, four kinds of users

Brands

Promote products and services with consistent, on-message campaigns.

Creators

Develop a personal brand with a steady stream of fresh ideas.

Students

Share educational content and build an online presence while studying.

Founders

Communicate ideas, tell the startup story and attract potential customers.

HOW IT IS BUILT

A simple architecture in four parts

Frontend

HTML, CSS, JavaScript

Selection form for audience, platform and goal, plus the calendar view.

Backend

Python

Receives preferences, builds the request and structures the results.

AI API

Content generation

Creates daily ideas, hooks, captions and calls to action.

Database

Optional storage

Keeps preferences, generated calendars and past content plans.

The database is an optional addition that enables saved plans and history.

WHY IT MATTERS

Less planning, more publishing

The aim is to reduce the effort of content planning while keeping online publishing consistent.

- ✓ Saves time and effort on content planning
- ✓ Keeps publishing consistent with a daily schedule
- ✓ Overcomes creative blocks with fresh ideas
- ✓ Improves productivity and strengthens online presence

FUTURE SCOPE

Where the project can grow

01	Downloadable calendars	Export a finished plan to share or print
02	Automatic post scheduling	Publish posts at the planned time
03	Performance tracking	See which content drives reach and engagement
04	Multilingual generation	Create calendars in the user's own language
05	Platform integrations	Connect directly with social media accounts

IN SUMMARY

Plan less. Post more.

A simple, practical and scalable way to turn ideas into a consistent online presence.

Thank you
